best glazing...

You are looking for a sustainable product?
We would love to develop something unique with you.

BEHOME
STANDS
FOR...

Based on our professional expertise, the materials are selected and put together.

- Alpi veneers from Italy consist mostly of poplar.

Different coloured veneer layers are glued in special procedures at Alpi headquarters. This results in a wide variety of **decors** with annually increasing product diversity.

Each product is manufactured in enough stock and is therefore a constantly available stock item.

- The birch multiplex wood of our temples as well as the **hinges of the glasses** have all the positive characteristics for the technical purpose.

In conjunction with Carbon pens you get maintenance-free hinges.

The sweeping hinge base and the contrast to the front are one of our trademarks.

- The **core** of our glasses are created with strong beech veneer.

Because of its uniform structure and sufficient hardness this wood is still malleable and ensures a long-lasting perfect seat of the glass.

- On the **surface** we use an oil on the basis of linseed oil.

This ensures that the wooden goggles stay tough elastic, durable and highly resistant to wear.

- All models have the same curvature.

The **front** design is optional and depends on the current trend and your preference.

By choosing between approximately 90 different decors and 8 different forms- everyone can find their **dream glasses**.

THE WOODEN GLASS

If you have an oval face, almost all forms of glasses will suit you. Depending on the desired effect, you can set more or less strong accents. An **edgy** glass brings more `hardness` to the face. An oval face can wear an exceptional glass- have the courage to experiment with forms and designs.

No.1 in Nussbaum, Breeze Oak & Indian Wood

If you have a heart-shaped face, you should try our **round glasses**, to have a less wide forehead and less pointed chin. Try it and take a look in the mirror! We are sure you will be pleased.

No.2 in California Burl, Fossil Forest & Cherry

FORMS

You feel like wearing something crazy or unusual?
Models such as **nerd glasses** and **huge glasses** in a fashionable retro look might be the ones you are looking for.
Be brave- try something new!

No.3 in Country Stripes und Burning Gras

If you have a round face you should go for square glasses, which stretch the face and let it appear more oval.

No.4 in Indian Wood, Dark Santos, Cherry, California Burl & Matrix

FORMS

For men **rectangular glasses** add an interesting contrast to the face and give additional edges.

The same can be achieved for women by adding a pop of colour. An absolutely eye-catcher.

No.5 in California Walnut, Fossil Forest & Crown Bark

Large glasses are very fashionable at the moment. You can achieve an even more **extravagant look** through light and dark veneers. If you love an individual and extraordinary design those glasses for you.

No.6 in Anthracite Oak & Sen Esche

FORMS

Eventually you realize that you can't see as well as before. That does not mean that the whole day you have to **wear glasses**. This glass is probably the most worn glasses. The look of the wood frame, embellish the hours of reading in addition!

No.7 in Fossil Forest

A real eye-catcher! This butterfly shape makes a wow factor.

No.8 in Sen Esche und Heaven&Heart

For all fans of classic design this piece in timeless black is the perfect choice for every occasion.

No.9 in Grey Ebony

FORMS

The art of glaze in cooperation with an optician.

- The optician can get all glasses in 2 standard **sizes**.
On request you can get an individual sizing by us.
- The fitting is similar to the plastic glasses and will be made by an optician.
Our glasses have a circumferential nut with 110° flank angles so a **correction glass** with bevelled edge can be generated.
 - The glass is **pressed** into the frame from the outside.
To ensure a precise fit, the mass of both glasses is taken separately from outside.
 - Under water vapour small **corrections** can be made at the u-shaped bar.
 - With **measuring instruments** the glasses are made to build ergonomic and suitable.

GLAZE

To enjoy your glasses as long as possible, please read this instruction carefully.

- Do not wear your glasses while taking a bath or sauna – the wood might be sensible against salt and chlorine.
- Put your wooden glasses down before taking a shower and going to sleep.
- Apply perfume, hairspray or other cosmetics before putting on your glasses.
 - Use a cotton cleaning cloth for the wooden glasses.
 - Don't use cleaning supplies, solvent, flowing water.
- In order to preserve the naturalness we treat all wood eyeglasses with oil. In the run of time the glasses adapt gloss level and colour of each client.
 - Our glasses are robust but not indestructible, please handle with care.
- Each glass will get a certificate with an identification number, please keep this certificate.
